District Grant # 1309

Project Report # 2

Rotary Club: ___ Worland WY

Project Title: _Rotary Riverside Park

Progress Report Final Report

Project Description:

1. Briefly describe the project. What was done and where did the project activities take place?
Who were the beneficiaries?

We will be partnering with Worland High School Biological Field Studies class to improve Riverside Park in Worland Wyoming. We will be renovating the park with Rotary Fitness Trail:

1. Better lighting
2. Paved Physical fitness trail
3. Exercise equipment
4. Rotary Placards

The city of Worland will be donating the cost for paving the path valued at \$3,500 and Carroll tree service will be donating the wood chips for the instillation of the equipment valued at \$1,000.

The objective of this project is to provide a place for physical activity for all ages at will be **free** for all to enjoy.

The sustainability of the park will be accomplished through cooperation of the Rotary Club of Worland and the City of Worland Parks Division. The City of Worland mows the park and clears the paths. The will oversee the maintenance of the park and take care of any major repairs if needed. We will incorporate our annual Rotary Picnic in the park and spend the day ensuring the equipment is in good working order, painting the equipment if needed and tending to any minor repairs that are needed.

Project has been put on hold by the City of Worland due to the ice jam in the spring of 2014 that flooded the park and destroyed the underground sprinkler system. The City of Worland asked us to wait until the repairs were made to the park. These repairs took longer than expected and we were unable to install equipment this fall. We are planning on starting instillation on April 11th 2015.

We have already purchased the solar lights and the exercise equipment for the park for a total of \$9,765.85. The remaining total for the project is \$1,234.20 and will be used to pave the path for the exercise trail.

2. How many Rotarians participated in this project? ___ 15 to date

3. What did they do? Please give at least two examples.

We had a small team that worked with Worland High School Biological Field Studies class to determine time line for project, equipment to be purchased, and meeting with Worland City Council on the condition of the park after the ice jam.

Once we are given the go ahead to install the entire club will be involved in helping install the equipment. Club Members gave many hours to cutting out the path and getting the path paved.

4. How many non-Rotarians benefited from this project? Approximately 25. Local stuedners and Boy Scout club

5. What is the expected long-term community impact of this project?

Once the exercise equipment is installed it will have a health impact on the community for those who cannot afford a health club membership.

6. If a cooperating organization was involved, what was their role?

9. Project score (5=strongly, 4=agree, 3= neutral, 2=disagree, 1=strongly disagree)

	Project Score	Comments
The overall project was successful	5	It took a lot longer than we planned but it is finally done
The grant process worked well	5	
My interaction with partner clubs was good	5	The Rotary Club of Worland have Awesome members
We achieved the results we expected	5	Community loves the walking path

10. What worked well on this project and why?
Club members committed to getting this park done.

11. What did not work well and how would you suggest improving it?

The original project was geared towards supplying funds for the park with the students in the advanced biology class installing the equipment along with the Rotary Club of Worland. The class was to making the arrangements for the work to be done. This did not happen. The weather cause havoc with ice jams in the Big Horn River that caused a two year delay with the city having to redo the underground sprinkler system in the park.
