

District Grant for Greeley Rotary – Centennial

Budget Description for Project P 1255

Project Year 2016-2017

A new educational facility is being built through the leadership of several Rotary clubs in and around Greeley. This grant request is to provide chairs for large community and school events held at the Poudre Learning Center. The seating capacity of the new facility will be approximately 400. The Centennial Rotary Club of Greeley is submitting this District Grant Request to purchase 400 folding chairs and chair racks to store them when not being used. The chairs will be of a material to allow them to be used in and out doors and can easily be cleaned.

I have uploaded pictures of the preferred chair that has a retail price of \$19.95. We are currently in communication with the supplier of the chairs to Sams. We anticipate a better price that will allow the possibility to also add some folding tables. In addition, we would like to add a Rotary Wheel on each chair if there is room on the chair.
