

## delivers hope to kids!

Through our OneMeal program, we have sent meals to over 22 countries including local food centers here in the United States. We strive to make OneMeal events as personal as possible. If there are countries or locations in need around the world that your organizations has ties with we will do our best, if you wish, to get the food you pack into their hands. We have ongoing partnerships in 8 different countries where the nutritional needs of over 10,000 children are provided for each day. We can work with you to determine the recipient partners of the meals that you pack.

### Some of our ongoing food partners include:

**South Africa** – Monte Cristo Ministries serves in the township communities of Paarl, South Africa. The nutritious meals that we send to Monte Cristo not only fill the hungry tummies of children but they also allow their family or orphanage to use their very limited resources to pay for school fees, clothing and medication for a variety of diseases.

**Nicaragua** – Verbo Ministries in Puerto

Cabezas provides for the nutritional needs of over 1,000 children each day. Their goal is to equip orphans with education and life skills to raise a generation prepared to be significant contributors to their society. Their feeding program extends beyond their orphanage to the impoverished in their community through a children's community feeding center and a food outreach program to those dwelling in and around the city dump.

**Haiti** – Our food is distributed amongst 70 churches and 21 schools reaching over 3,000 children in the North Central part of Haiti. Many of these children do not receive proper nutrition or even a basic meal before attending school. With these school feeding programs every child that attends receives a proper nutritious meal and a quality education.

**Tanzania** – In partnership with Friends and Family Community Connection we are able to provide for critical nutritional needs as they help assist the government and community leaders throughout Tanzania with sustainable solutions for food, water, health and educational needs.

**Jamaica** – Embracing Orphans uses our food to support their Children's Homes, which house over 400 kids with special needs and children affecting by HIV. Our

food also helps assist their support groups that strive to help impoverished families stay together.

**Swaziland** – Children's Hope Chest establishes and runs community centers throughout Swaziland. These centers serve as feeding centers, training facilities and community outreach locations to help children and families move from a situation of poverty to meaningful, productive lifestyles.
