Hello Larry and Katie,

Thank you again for sponsoring the TPHS robotics team! We completed building our robot this week and are getting ready for the competition on March 11th. We had six weeks to build a robot for this year's FIRST competition modeled after an "airship race." We had to score balls to build steam pressure, then deliver gears to pilot the airship for installation and finally the robot had to ascend the rope to signal they are ready for takeoff! Here is a photo of our competition robot next to our practice robot.

Also, the Del Mar Times included an article sent by Casa de Amistad about the TPHS robotics team, attached. They included information that the Del Mar Rotary club sponsored the purchase of the 20 Hexbug robots. The K to 3rd grade students were very excited when they received the Hexbugs and I hope they are inspired to become future engineers!

Thanks again,
Nicole
