Grant Information (to be completed by District Grant contact)

1. District Grant # (check website for #) P-368
2. Name of District Grant Clean Water for St Anne Grace
3. Briefly describe the grant and list any changes that might have occurred (100 words or less. A borehole water well was drilled and installed on campus at St. Anne Grace Secondary School in Nakifuma, Uganda. The borehole was connected to a hand pump so students can easily pump fresh clean water into their jerrycans. Access to clean water will boost enrollment at this school since parents now know that if they send their students to this secondary school, they will not be sick from drinking contaminated water.
4. Provide a brief (100 words or less) of lessons learned in implementing this grant and how this will improve future grant funded projects: In the past, students at this school had to fetch drinking water from a contaminated pond. As the drilling company surveyed the hydrological and geological features of the campus, it became clear that a well drilled to a depth of 200 feet would reliably provide clean water for the campus, without threat of drying out during the dry season. It has also been learned that projects such as this, with modest costs, fit well with Rotary priority projects focused on clean water, and each borehole impacts the lives of hundreds of students as well as hundreds of local families in the region.
