

ROTARY DISTRICT GRANT P-3950 FINAL REPORT

The Manteno Rotary Club has continued our tradition for several years of supporting 2 graduating seniors from Manteno High School as they begin their college careers. In 2021 we presented two scholarships of \$1,000 each to Aiden Carroll, now a student at Illinois State University, and Alina Miles, a student at .

The Manteno Club does careful reading of each of about 10 scholarship applications we receive each year. We look for students who not only do well in school, but who are seeking ways to be a positive influence on other students. We also look for those who are already involved in the community beyond school. We are confident the two applicants we chose will make a difference even while they are still in school and most certainly afterwards as well.

After we chose our 2 recipients, we invited them and their parents to come to our club meeting to share their plans for college and the future. Aiden and Alina were both eager to do great things with their lives!

We presented our scholarships one semester at a time and they have both continued to be successful in school. Rotary has made a contribution to their future so that they can contribute to making our world a better place!
