

ADA Bathroom remodel

P-4157

Total budget for the project is \$55,840. This grant will cover some of the expense of the project. The remaining cost will come from in-kind labor from Habitat employees, and grants submitted by Habitat and Community Entry Services (CES) to the Community Foundation, a local non-profit foundation supporting local community needs. Any remaining cost will come from Community Entry Services operating budget. CES is not funded for improvements to their residential housing and relies mainly on contributions from the public and organizations. This need was identified by CES a year ago and we stepped in to assist Habitat with these much needed improvements and to cover as much of the material and contracted labor cost as our club could manage.
