Subject: Timeline:

Timeline:

October 2013:

Order water bottle filling stations and coordinate with city regarding locations and installation. Pursue partnerships with manufacturers of reusable water vessels that could be incorporated with the Rotary logo.

November 2013:

Prepare bilingual materials for public awareness campaign and disseminate.

Late November 2013:

Station dedication with media present for publication of news articles.

Throughout the year, we will be promoting the project by using Rotary logo water vessels at our service project, fundraisers and Rotary volunteer assisted sporting events. We will network with local teachers, the Chamber of Commerce, Catalina Conservancy and the cross channel transportation services by providing information to encourage people to use the water filling stations in lieu of buying single use plastic bottles.
