

Rotary Beach Concrete Stairs

Updated about 2 weeks ago

First City Rotary has nearly finished our Rotary Beach Concrete Stairs to the Northern Beach. As the President of First City Rotary for 2013-14 and Grant writer for this project have a commitment to finish the Railings and signage. There will be more improvements over the years our new First City Rotary President Chris Baca (2014-15) and Board have made a commitment to put in more improvements like fire pits, etc.

Many thanks go to the individuals you see in these photos along with all of the guards of the final product last night (Bacas and Diane Gubatayao), local citizens of Ketchikan who help keep the area clean and ALL OF YOU DUCK TICKET PURCHASERS!!! Many thanks go out to [Fred D. Monrean Sr.](#)

Engineering for preparing the final drawings, to the Borough of Ketchikan and The Corps of Engineers for permitting our project, President Rosie Roppel for writing the grant and helping with the design, Rotary District 5010 for our Matching Grant. Many thanks go out to our Past Rotary Projects Chair Jen Wescott and new Projects Chair Chief Rydeen, and the project manager Dick Miller who was the main consultant on the design work. Thank you for donating your time, trucks and expertise: [Lori Linville](#) and [Liquid Stone Designs, LLC](#), who donated their concrete pump truck and finishing work and [Scott Davis](#) with [Cheap N Easy Handyman Services LLC](#) who stepped up to the plate when vandalism took place.
