Project Title: Septic Tanks for Corazon

Progress Report Final Report

1. Briefly describe the project. What was done, when and where did project activities take place, and who were the beneficiaries?

Because the contractor originally expected to build these tanks in Tijuana discovered a conflict with their Maquiladora license it was decided to train Corazon employees and another contractor how to build septic tanks with the new molds. This training took place in four days spread out over the last two weeks. See submitted pictures of training in progress that also resulted in the production of the 1st Septic Tank in this program to be produced locally by Corazon in Mexico. A major step towards sustainability.

2. How many Rotarians participated in the project?

Two, so far. Many more will participate in the installation of this and other tanks produced locally in Mexico and the housebuild that will utilize these tanks.

3. What did they do? Please give at least two examples.

Drove to Tijuana, stayed in a hotel.

Participated in the many, many step process of building a 350 gallon, hand laid fiberglass septic tank.

4. How many non-Rotarians benefited from this project?

Entire communities will benefit from converting open sewer sources to sanitary best practices.

5. What are the expected long-term community impacts of the project?

Improved health and quality of life for all.

6. If a cooperating organization was involved, what was its role?

Corazon and it's community members are actively engaged and hands on, every step of the way.
