

Individual Project Interim Final Report

Please complete, print, sign, scan and upload this report into your project's Documents tab. In addition to this form, include all invoices (be sure they are marked "paid"), receipts, and/or copies of checks for the full amount of the project budget.

Rotary Club: Anchorage East

Project Title: Myanmar Water Pond – A Clean Water Project

Project Description

1. Describe the project. What was done, when, and where did project activities take place?

Water sources in Myanmar are primarily water ponds – depressions in the land that collect water during the long rainy season. The pond water is never sufficient for an entire year – leaving the people without any water or having to walk miles to find a nearby source. The purpose of this project was to deepen the pond in the village of Ywa Haung Taw. The original plan was to deepen the pond an additional foot. Thanks to additional donations from individual Rotarians and nonRotarians, the pond was deepened a total of 3 additional feet – thereby vastly increasing the water storage. The final construction stage will be the installation of a fence around the pond to keep children and animals away from the pond; and the construction of a platform and stairs - enabling the residents to access the water without walking directly into the pond. Because there is a very long rainy season, the digging could not begin until the end of the rainy season: the end of April 2015. The work on the fencing/platform/stairs has not yet happened now – during the dry season - there is no water available with which to cast the poles for this work. Once the rainy season begins again, then water will be available. Thus, it is estimated that this project will be totally finished by the end of October 2015.

2. How many people benefited from this project? To be reported

3. Who were the beneficiaries, how were they impacted by this project, and what humanitarian need was met?

This project is intended to provide a year-round available water supply to the village. Before this project, the villagers took water from this pond for as long as the water was available. However, once the dry season came, the pond had no water and the villagers had to walk miles to search for a pond that might have water. Since other villages were suffering the same problem, this was no easy fate. Walking in search of water kept children from school; consumer unnecessary hours of the women's days; left everyone with little water for all their basis needs. This new water pond is 3 feet deeper than the original and it is expected that there will be adequate water year round. The pond will need to be maintained on an annual basis but the villagers have committed to do this maintenance work on their own.

4. How many Rotarians participated in the project? 8

5. What did they do? Please give at least two examples, not including financial support provided to the project.

Rotarians visited the village; met the residents; toured the site of the water pond; photographed the site; shared a meal; blew and tied balloons for the children; wrote a news article about the project for publication in the newsletter of the Health Education and Wellness Rotarian Action Group; fundraising amongst nonRotarians; consulted with project leaders and provided guidance on grant reporting requirements; demonstrated/trained the villagers how to use the water purification indicators

6. If a cooperating organization was involved, what was its role? There were several:

- a. Rakhine National Social and Welfare organization accompanied us on the trip; provided armed security for travel to this dangerous part of the country; photographed the events; produced a video.
- b. Interact Club of Anchorage East High School provided 117 water purification indicators to determine when boiled water/milk is pasteurized and safe to drink.
- c. _____ provided free air travel to take us from Yangon to Sittwe.
- d. Aung San Soo Kyi Foundation staff helped with travel logistics and accommodations

Financial Report (District must retain receipts of all expenditures for at least five years)

Currency Used: kyat Exchange Rate: _____ = 1 USD

7. Income

Sources of Income	Currency	Amount
1. District Grant funds received from the District	USA	\$2000
2. Rotary Club Contribution	USA	\$2000
3. Other funding (specify) Individual donations, Rotarian and nonRotarian	USA	\$3300

Total Project Income

USA

7300

8. Expenditures (please be specific and add lines as needed)

Budget Items	Name of Supplier	Currency	Amount
1. Labor-Pond Dig	Individual workers listed	kyat	
2. Labor-Pond Dig	Individual workers listed	kyat	
3. Labor-Pond Dig	Individual workers listed	kyat	
4.		kyat	
5.		kyat	
Total Project Expenditures	US \$3000 to date	kyat	3,017,000
