

Journey to the Ocean

On the Water Field Learning Experience

Offering Field Trips for First-Third Grades

The Newport Sea Base provides interactive, hands-on stations are designed so that students can learn about the amazing Newport Harbor while developing their Life Science, Math, Language Arts, Investigation and Experimentation, and History skills and knowledge.

By being a “scientist for a day”, students learn about the species that live in the harbor, how they have adapted for survival, and how they are affected by their environment.

Each grade experiences two different rotations of activities. Every year they return they have an entirely unique experience.

Program is based on State of California Content Standards.

The Newport Sea Base seeks to serve the youth of greater Orange County by providing quality marine programs that will instill solid values, encourage effective team work, teach nautical safety skills, and provide a venue for all to enjoy the wonders of the waterfront.

The Newport Sea Base has provided quality maritime programs for youth since 1937. With a commitment to developing character, our desire is to inspire a love for the marine environment in the hearts of young people.
