

District Grant # P-747      Blackfoot Rotary Club

Ghana make a difference

A local group from here in Idaho built and funded a childrens' home and school in Accra, Ghana. The charity has used all the available funds to build the home and didn't have any left for landscaping around the building. Because of this there is flooding and sanitation problems. By planting some grass and adding a retaining wall this will alleviate the flooding and allow the children a cleaner, safer and more sanitary place to sleep and live at. The project was set to start at the end of September but do to the Ebola scare we have moved the project to February. The project should take about 2 weeks to complete. We have a group of about 15 local Idaho residents going to help including my wife. This a project that our club is very excited about.

No Rotarians went to Africa. My spouse went with other volunteers.

			balance
Donation from Rotary Club (\$4000 @ 3.85 cedi per dollar)		15400	15400
Polythene for the pavement ( 1 roll)	pavement materials	-650	14750
