## Laser Profile

### The right tool for Skin Rejuvenation Treatments and Hair Removal

Palomar Starlux 300 IPL Intense Pulsed Light System platform is a compact and flexible system that is used to perform the most requested types of procedures and laser treatments such as skin rejuvenation and hair removal. The Palomar Starlux 300 has been proven to provide perform as well as or better than single procedure lasers. It delivers the highest power available with a repetition rate 70% higher than previous models. Plus, Starlux 300 uses innovative smooth pulse technology prevents epidermal temperature spikes – more comfort for your client.

This compact innovative Starlux 300 has various hand pieces that can be used to perform a wide variety of procedures and laser treatments. The Starlux 300 is therefore especially suited to allow a business to expand treatment procedures offered without purchasing another base unit. As your business grows, the Starlux 300 will increase its usefulness.

### The Palomar Starlux 300 can be used for the following types of treatments:

- Pigmented lesion treatment
- Vascular lesion
- Photofacial for the treatment of vascular and pigmented lesions
- Permanent Hair Reduction
- Hair removal on skin types V, VI
- Leg Vein Clearance
- Fractional Skin Tightening through soft tissue coagulation
- Fractional Non-Ablative skin resurfacing
- Ablative skin resurfacing
- Scar revision
- Superficial skin lesions
