Hi Mac,

My clinic coordinator tells me that they were able to use the building on Saturday, and we got many pictures of the construction from our friends at DIF who are helping us with the construction. I hope that you can see the finished roof for yourself during the January trip.

Anelah

Hi Mac,

I've attached some before pictures. We are going to visit our clinic this Saturday, the 10th. At that point we hope the work will have been completed and we can send the pictures – if the work has not been completed then I will tell you that as well.

Anelah

Mac can you write me up a paragraph or two describing the work that was done on the Chaultepec clinic. The date the work was finished.

If you have a picture of before and after that would be great.

I will see you on Wednesday
