PLACE WHERE THE PROJECT WILL BE IMPLEMENTED

Siteler Zone , (Connected to District Keçiören)
City: Ankara
Country: Turkey
Adress: Goreneller School for Blinds, Siteler/Ankara,

NAME OF THE PROJECT

Supply of Braille Printing Unit for the Goreneller Primary School for Blinds.

PARTS INVOLVED IN THE PROJECT

1. Goreneller Primary School
2. Rotary District 2430
3. Rotary Club of Kavaklıdere, Ankara
4. Ministry of Education / Turkey

DESCRIPTION OF THE PROJECT

Goreneller Primary School is a school for blind children which applies an education program for the children who are visually impaired. Our Project is to supply this school, a unit, which includes the 3 PC's, Latest version of JAWS screen reading software, and the Braille Printing Unit.

AIM OF THE PROJECT

We aim to set this unit to improve the education standards of the Blind children. Our plan is to set up a system that gives the Goreneller Primary School, the ability of creating new Braille education materials. With this unit we do not only set up a screen reading PC, also we plan to give the ability of Creating/Converting the standart teaching materials to Braille teaching materials in house.

THE BENEFITS OF THE PROJECT

Being visually impaired seems to decrease the quality of the education so much. But with the evolution of the “Use of technology in teaching materials”, the limitation of the education quality for blind children is circumscribed. With the use of Braille Unit technology, the quality of the education is apparently increased. The students of the school, can vocally track the screen of the PC with the help of JAWS software and also on the other hand the Unit can print Braille materials which students can read it by touching. We plan the diversify the teaching materials to increase the education quality.

RESPONSIBILITIES

- Kemal Demir is responsible for Braille printers and software functional tests examinations. The teachers of Ministry Of Education also have witness role for examinations.
- International Rotarians contribute to financial aspects. Their contribution serves to complete of the Project budget.
- School teachers and School management is responsible for collecting information, monitoring, and evaluation. The evaluation belongs to Ministry of Education officials. Also teachers shall reflect student views to the Ministry Of Education.

ACTIVITIES

- Order of the product
- Transportation activity of equipment and software to School
- Operational controls and tests
- Updating the old software
- Training activities for teachers
- Starting to use the system
- Sustainability and Evaluation of the results of the acquired system
