Project planning

Describe the community needs that your project will address.

This Project will address important needs of the community who is still victim of having no or negligible toilet and wash facilities. The project will eliminate chances of diseases like diarrhea, cholera, typhoid, dengue etc. The project will also bring a tangible change and improvement in the living conditions of the people for whom toilets and the wash facilities are being created. The survey has been conducted by the Rotarians who have identified the slum areas/villages/schools. The survey has revealed very touching stories which reveal deaths of infants and pregnant women because of insanitary conditions.

How did your project team identify these needs?

This is a problem at the National Level that people do not have toilets in their homes and they go in the open for defecation. The team mentioned in the grant had frequented the area identified and thought of the present project.

How were members of the benefiting community involved in finding solutions?

The members of the benefiting community jumped at the idea and they welcomed the proposal with a thanks giving heart.

How were community members involved in planning the project?

The leaders of the community/Principals and teachers of the schools of the concerned have been involved in formulating and planning the project. The concerned community may come out to work as labour in making the toilets.

Project implementation

#	Activity	Duration
1	Construction of toilets/washrooms/wash stations	6 months

Will you work in coordination with any related initiatives in the community?

No

Please explain. Are local initiatives not addressing these needs? Or, if they are, why did you decide not to work with them?

There is no local initiative.

Please describe the training, community outreach, or educational programs this project will include.

It is very essential to hold extensive training for the community to educate them about the drawbacks of defecation in the open. They will also have to be educated about the maintenance of toilets and keeping them clean. This training will be given during the period of construction. Rtn. Dr. Narinder Pal Singh of Rotary Club Jalandhar City and Rtn Dr Sukant Verma from Rotary Club Jalandhar will perform this duty.

How were these needs identified?

These needs are already identified at the National Level.

What incentives (for example, monetary compensation, awards, certification, or publicity), will you use, if any, to encourage community members to participate in the project?

The construction of toilets in itself is a great compensation/award for the community.

List any community members or community groups that will oversee the continuation of the project after grant-funded activities conclude.

The local leaders of the community will be given this task but the rotarians will oversee the sustainability of the project.

Budget

Will you purchase budget items from local vendors?

Yes

Explain the process you used to select vendors.

The committee of Rotarians will visit the market and will identify the vendor on cost cum quality basis.

Did you use competitive bidding to select vendors?

No

Please explain.

This is a job where bidding may not help.

Please provide an operations and maintenance plan for the equipment or materials you anticipate purchasing for this project. This plan should include who will operate and maintain the equipment and how they will be trained.

It is already explained that members of the community will be trained and educated and motivated to make full use of the toilets provided to them and this will certainly inculcate a habit of maintaining the toilets.

Describe how community members will maintain the equipment after grant-funded activities conclude. Will replacement parts be available?

The maintenance will be done by the beneficiaries as it involved no cost and only cleanliness is needed. Rotary club will bear the maintenance cost if any for the next five years.

If the grant will be used to purchase any equipment, will the equipment be culturally appropriate and conform to the community's technology standards?

Yes

Please explain.

There is nothing which is culturally inappropriate.

After the project is completed, who will own the items purchased by grant funds? No items may be owned by a Rotary district, club, or member.

All the items will be consumed for completing the project and this will become the property of the beneficiaries.

Funding

Have you found a local funding source to sustain project outcomes for the long term?

Yes

Please describe this funding source.

Past District Governor Rtn S V Hans is taking keen interest in the project and has assured that he will take adequate steps and meet financial obligations to sustain the project.

Will any part of the project generate income for ongoing project funding? If yes, please explain.

No
