Compact Full Field Digital Mammography (24x30)

24x30 cm FULL FIELD DIGITAL MAMMOGRAPHY SYSTEM COMPACT

The FFDM Helianthus C is complete mammography solutions optimized for digital imaging. They are composed of:

- Mammography Unit with X-Ray tube and Indirect Conversion Amorphous Silicon detector 24x30 cm format with not Isocentric (Helianthus C);
- Integrated X-Ray control and image Acquisition Software

The Mammography Unit is inclusive of:

- High voltage generator:
 - o 100 kHz ripple – 5 kW power
 - o 20 ÷ 35 kV (0,5 kV step) (20 ÷ 40 kV optional)
 - o 1 ÷ 640 mAs
- Helianthus C: not isocentric C-Arm with motorized vertical movement and manual rotation. Fixed focus-detector distance of 66 cm
- X-Ray tube with tungsten biangular anode:
 - o 0,1 and 0,3 mm focal spots
 - o 300 kWh maximum anode heat content
 - o Automatic filter
 - o Automatic collimation device from standard examination to geometric magnification
- Indirect Conversion Detector:
 - o 24x30 cm format
 - o Technology: Amorphous Silicon (a-Si)
 - o Depth: 16 bit
 - o Pixel Pitch: 85x85 µm
 - o Resolution: 2816x3584 pixels (24x30 cm format)
 - o Read time: <1.1 s (24x30 cm format)
- “Smart µPress” (microPress) compression system:
 - o Motor-driven adjustable force and manual compression with safety release
 - o Force really exerted on the breast shown on four displays
 - o Breast thickness shown on four display
 - o Descending paddle speed proportionally reduced with increasing compression force
 - o Compression paddles with softly curved and smooth lines for higher patient comfort
- Two emergency push-buttons
- 2 MPixel Color LCD Display System (21.3” viewable size)
- Wireless Keyboard with touch pad
