To,
The Secretariat of The Rotary Governor,
RI District 3000,
Trichy.

Respected Governor,

Sub: Construction of Science Laboratory at HC Kothari Balavihar Matriculation School under the Grants scheme for benefitting the Rural Village Children - Sanctioning and Approval - Requested - Reg.

Warm Rotary Greetings from Rotary Club of Kattur.

Rotary Club of Kattur has immense pleasure in serving the human mankind since the year 1963 and is in its 57th year of Charter.

Since the RC of Kattur has been located in the rural hamlet of Kattur Village, its main focus of services extends mainly to the welfare farming community mainly living below the poverty line in the nearby 50 villages deprived much of basic facilities for the primary needs of food, Shelter and education to their next generation kids.

RC of kattur also serves for the farming community by imparting knowledge on modern day farming and sustaining their livelihood to take of their basic needs and to cater the society with the farm produce.

By way of continual service projects, year after year by the incoming President, Secretary and the members of RC of Kattur has contributed to the rural women empowerment and uplifting their living standards.

Rotary Club of Kattur, in pursuit of service to the upcoming generation of this rural area, has identified a project for this Rotary year 2018-19 for the construction of the School Science laboratory / Two class rooms.

This project is proposed for HC Kothari Balavihar Matriculation School located at Kattur.

Brief History of the School:

HCK Balavihar Matriculation School is a Non-profit making education institution primary focusing on providing quality education to the rural children drawn from nearly 15 villages which are deprived of school infrastructure for shaping up the children education career.

HCK Balavihar provides the quality education at a much affordable cost to the first generation children to the parents with meagre education / education back ground.

The parents of these first generation children primary does the agricultural activity and the meagre income thus drawn by them will not be sufficient to give their children the quality education and to face this competitive world in the near future.

The parents earning will be just sufficient to make a below normal livelihood and the children education will be compromised or at many instances the children will not further pursue their school education in complete.

HCK Balavihar Matriculation School envisaged the need for the school with state of art infrastructure and took up the noble service of providing quality education at much affordable cost.

HCK Balavihar was incepted during the academic year 2011-12 as the Nursey and Primary School with a meagre strength of 45 students.

Over the past seven years of its presence, HCK Balavihar has introduced further higher standards and has presently enrolled 964 students (Girls students are 429 and Boys students are 535) during the ongoing academic year 2018-19.

HCK Balavihar, presently caters the education needs of the rural students from Pre KG to Tenth standard and also teaches Hindi as an additional language to the students at all standards.

Advantages / Benefits of the envisaged project for the Science Laboratory / Additional two class rooms.

Construction of Science Laboratory:

The envisaged Rotary Grants project for the construction of the Science Laboratory at HCK Balavihar Matriculation school located at Kattur has the following advantages.

1. The Present day students will be able to understand the science basics with much better clarity as prescribed in their syllabi.
2. The thinking power gradually improves and the interest toward the subject increases considerably.
3. The conceptual understanding of the core principles of the subject will be understood by way of doing the practical lab trials and this strengthens the IQ Level.

ROTARY CLUB OF KATTUR

KATTUR, LALGUDI (TK), TRICHY (DT),
TAMILNADU, INDIA - 621 706.

56th Year of Charter

Kothari Sugars & Chemicals (P) Ltd.,
Kattur - 621 706, Lalgudi (Tk)
Trichy Dist.
(M): 97509 11128.

4. The lateral thinking concept improves considerably and this paves way for the
5. Newer concepts will kindle the young students mind and this will be like sowing the seed for the future scientist in the making.
6. The core concept understanding will enable to do well in their academics and scoring high marks.
7. The practical way of science concept understanding by the student will make them remember for their life time.
8. Of all the above advantages envisaged, training the mind to become the future scientist will be inculcated at a very younger age itself.

Construction of additional class rooms:

In order to cater the increased student strength at HCK Balavihar, there exists a immediate need for the need of additional two class rooms.

The following advantages are envisaged for the construction of additional class rooms at HCK Balavihar Matriculation School.

1. The Students will be able to be in conducive atmosphere of enough free space and will be able to concentrate in their curriculum in a much better way.
2. The concentration in their curriculum will increase the interest shown by the students towards the studies.

In this regard, please find attached here with the Photographs of the proposed model of the Science laboratory in the Annexure no:1.

Cost Estimation.

The offers for the civil construction was collected from the competent civil contractors and the least quote with prior similar experience in the construction have been considered in the final evaluation.

Of the offers collected for the construction of the science laboratory and the additional two class rooms, M/s AEM Constructions quote was competitive and based on the prior experience in executing similar nature of Job
