KURTARIN**

**BLOOD
DONATION
CAMPING**

**SHORT of
Donors &
Donations**

Turkey, has low profile
in blood donations
where by **only 1.5**
percent of the demand is
supplied.
(In developed countries
this figure in average is
above % 5)

**HOW ROTARIANS WILL
HELP to IMPROVE SUPPLIES?**

ASSESSMENT OF THE NEED AND THE BENEFICIARY BY THE ROTARIANS

9 Rotarians has worked and 7 Rotarians still working as doctors at Çukurova University hospital.

3 Rotarian husbands worked for long years at Çukurova University hospital as doctors.

All with the knowledge and experience of the need of short supply of blood, and the shortage of volunteer donors,

By Anonymous decision of Club Rotarian Doctors, 2013 2014 GG Club project,a mobile unit for Cukurova University Hospital who will be responsible training , enhancing donors, , to increase blood supplies were agreed.

The technical personnel and maintenance of the mobile unit for the sustainability of the project was also decided to be given to the University Hospital who is the beneficiary.

BY REACHING TO RURAL PARTS OF THE REGION

Beneficiary the Cukurova University Hospital is to organise and develop their blood collections from donors fm rural region

WHY IS THE NEED TO STOCK LONG TERM & FULFILL SHORT TERM NEEDS

1998 Adana Earthquake

**158 died, 1468 injured,
1860 houses diminished**

The beneficiary : University of Cukurova, Medical hospital will be the beneficiary and will implement the training to enhance donors and collect the blood from the donors which is the major local hospital located in Adana , covering an area of 100 000 sq miles area, serving as biggest hospital to a population of 10 million people. Founded in 1975 with 1200 patient bedding capacity. The blood bank within the hospital units is a licensed blood bank center. But does not have sufficient mobile blood collecting facilities. Therefore currently always the shortage blood is come acrossed to. It's annual need is approximately 60 000 units of blood. (Each unit volume is 500 cc). However blood bank is only processing 30 000 units of blood currently.. Surgery uses % 30 pct, and the rest is used by the Thalassemia patients who need blood transfusion. When a patient is in need of blood , they must find a donor (from a relative or family member.) **Current rule in practice is , find a donor, then donate blood first ,for your own need, whether it is transfusion or a surgery.**

Rotarians is to provide full accessory mobile blood collector bus which will be donated to the University of Cukurova, University Hospital.

Through Local Purpose built bus (TEMSA Automotive A.S.) manufacturers.

Trained personel+maintenance of the bus will be provided fully by the University of Cukurova Which will be fully equipped for public education and collecting blood and preserving blood.
