Product Description

Style: **With Hard Storage Case**

Amazon.com

The Enhanced Actron CP9580A AutoScanner Plus OBD II, CAN & ABS Scan Tool is the ultimate choice in handheld automotive diagnostic scan tools. It is suitable both for advanced automotive do-it-yourselfers (DIYers) and automotive professionals alike. Not only does it capture and analyze data like other scan tools, but it also can help you prioritize troubleshooting with access to the most probable solution based on top reported fixes specific to the vehicle's make, model, year and engine. Additional features include live engine data, graph live data, freeze frame data, drive cycle mode, print functionality and much more.

The Advanced Handheld Scanner That Troubleshoots for You

Since the 1980's standardized Onboard Diagnostic systems (first OBD-I and currently OBD-II) mandated for virtually all cars and light trucks manufactured for the US market have provided automotive technicians, and increasingly DIYers with insight into the increasingly complex inner workings of modern passenger vehicles. Traditionally professional grade diagnostic results required large and/or expensive scanning tools to translate diagnostic trouble codes

(DTCs) and other data generated by the internal computer networks of your vehicle when the check engine/malfunction Indicator light (MIL) on the dashboard goes off. Now there is a much better way using the Actron CP9580A AutoScanner Plus Scan Tool.

CodeConnect quickly pinpoints and suggests fixes specific to your vehicle

The Enhanced CP9580A AutoScanner Plus with CodeConnect does way more than just displaying the trouble codes and definitions seen in other handheld scan tools. At the touch of a button it can also actually help prioritize troubleshooting using the top reported fixes related to these codes, specific to your vehicle's make, model, year and engine. Once codes register on the device, AutoScanner Plus indicates on screen which codes have the CodeConnect details available. To gain access to these possible fixes, all the user needs to do is push the CodeConnect button in the middle of the keypad and the most probable solutions according to the data on file will be displayed. CodeConnect is a comprehensive database of 4.3 million ASE verified fixes for the trouble codes that cause the check engine light to illuminate, providing a shortcut for troubleshooting efforts. Advanced functionality built into AutoScanner Plus also includes advanced domestic ABS code coverage allowing read/erase capability for most 1996-2010 GM, Ford and Chrysler and 1996-2009 Toyota, Honda, Hyundai and Nissan vehicles (click to see an ABS compatibility chart). Additional features include LIVE engine data, graph LIVE data, freeze frame data, drive cycle mode, updateable (via USB port), print functionality and much more.

Compatible with OBD-II and CAN vehicles 1996 and newer, and includes expanded Asian and ABS code coverage

John

Gracias por su respuesta y le explico:

Pase a verificar su cisterna al parecer no ha sido llenada al 100% , la oxidacion visual es solo en pisos y parte de muro expuesto al agua actualmente, no obstante mi duda es si ya a estado llena de agua en algun momento, no visualice (esta duda).

En relacion a sellar es recomendable al 100% y resulta en 300m2 considerando el techo puesto que el agua por evaporacion sube y se precipita al ser area cerrada, consecuentemente los puntos de oxidacion son en toda superficie de contacto o no del agua contendida en este espacio cerrado.

El plan es :

Un revestimiento precio con aplanado base de cemento plastico especial y posteriormente un sellado con el revestimiento para cisternas denominado (Sellokote de Imperquimia) es el que he estado aplicando incluso en albercas.

El precio que le di es precisamente para una cisterna y no para una alberca, puesto que una alberca es decorativa la imagen final es otra y otros productos ,consecuentemente una alberca terminada el precio es otro : compare 300m2 x 45 dlls m2 =13,500 dlls =\$175,000 m.naccional si se tratase de una alberca ok.

Conclusion me pidio una cotizacion de trabajo a aplicar , le deje la informacion recabada en campo y el costo, si le parece aceptable hagamelo saber. Mi compromiso es material y mano de obra regularmente , al aceptar y firmar la orden del mismo se hace un listado descriptivo del proceso, material,mano de obra e implementpos a utilizar incluyendo la seguridad de proteccion personal al aplicar el producto.

sin otro particular , seguire asistiendole , puedo apoyarle en sistemas de automatizacion de equipo, suministro del mismo, hasta llegar a sistema de filtracion de osmosis inversa para uso humano ,haciendo el estudio previo del agua contenida . Ademias le puedo implementar sistemas de energia solar y eolica para generar su electricidad y sea autosuficiente a partir incluso del pozo de agua la extraccion de la misma sea con lo solar y vientos locales. En fin este es nuestro perfil de servicio.

Calentar el agua con el sol.

Hacer un lago con membranas plasticas paraíso temporal y uso de riego agricola.

Hacer del lago algo recreativo

hacer una alberca (minialberca o gran alberca)

En fin el lugar invita a hacer mucho, que quizas no sea compatible a su vision de proyecto entorno.

Por ejemplo hidroponia y acuaponia (temas de cultura y bienestar de vida) de aqui se alimentaria su gente.

Ademias de educarlos en procesos de la vida natural.

Espero su comentario final o de inicio al tema.

Atte.
