

# The new IOLMaster 500 from ZEISS Defining biometry

NEW Markerless Toric IOL Alignment

We make it visible.

The moment you trust the experience of 100 million IOL power calculations. **This is the moment we work for.** 

// IOLMASTER 500 MADE BY ZEISS

# **Gold standard** biometry with the new ZEISS IOLMaster 500

The ZEISS IOLMaster<sup>®</sup> revolutionized the field of IOL power calculations. For over a decade, we have partnered with surgeons like you to continue improving the gold standard in biometry. With the new version of the ZEISS IOLMaster 500, we are continuing the success story – the numbers speak for themselves:

#### More than 3 out of 4 surgeons

worldwide working with optical biometers trust the IOLMaster devices for their IOL power calculation.<sup>1</sup>

#### More than 200 IOL models

can be found in the User Group for Laser Interference Biometry (ULIB) with optimized A-constants for the IOLMaster.<sup>2</sup>

#### More than 40,000 surgeries

contributed to enhancing IOL power calculation with the IOLMaster by providing optimized A-constants in the ULIB.<sup>2</sup>

#### More than 100 million power calculations

have already been successfully performed with the ZEISS IOLMaster.

## Working with gold standard biometry The ZEISS IOLMaster 500 highlights

When you work with the new version of the ZEISS IOLMaster 500 you not only directly experience the result of continuous refinement; you also get a piece of cutting-edge technology that points the way to the future of optical biometry.

#### Improving refractive outcomes

Exclusive formula integration, more than 200 optimized lens constants and unique telecentric keratometry for refractive outcomes you can trust.<sup>3</sup>

# Advanced measurement of challenging eyes

Up to 20% higher measurement success ratio for dense cataracts.<sup>4</sup> Measurement along the visual axis, even with staphyloma, pseudophakic and silicone-filled eyes.

#### Proven toric outcomes

Toric outcomes proven by large number of peer-reviewed, published scientific papers.<sup>5</sup>

#### **Markerless toric IOL alignment**

New reference image capabilities, as the starting point of a game-changing, streamlined markerless toric workflow.

#### Ease of use

Well-designed user interface, plausibility checks, distance-independent measurements and speedy readings for one-of-a-kind usability and reduced chairtime.<sup>6</sup>

# Superb connectivity: Ties in the A-scan ultrasound

Universal ultrasound interface to connect the dedicated ultrasound A-scan device for a better workflow and improved quality.

### Improving refractive outcomes

#### Holladay 2 integrated

The ZEISS IOLMaster 500 exclusively has the recognized Holladay 2 formula on board. You can continuously minimize your prediction error for IOL power calculation. Just enter the postoperative refraction of your patients - all other data is automatically fed into the Holladay 2 software calculation.

#### Over 40,000 cataract surgeries evaluated for better refractive results

The extensive clinical experience of the ZEISS IOLMaster 500 is reflected by the User Group for Laser Interference Biometry (ULIB) website. The ULIB database contains more than 200 lens constants continuously optimized with over 40,000 sets of patient data created with the ZEISS IOLMaster - absolutely unique in the industry.<sup>2</sup>

#### **Telecentric keratometry**

The new ZEISS IOLMaster 500 is the only optical biometer to feature distance-independent telecentric keratometry. It enables robust and repeatable measurements due to constant spot center distances. Thus the ZEISS IOLMaster 500 shows excellent agreement with manual keratometry while achieving superior precision performance, making its keratometry the most trusted among cataract surgeons.7

"The IOLMaster has significantly changed the way biometry is performed and continues to do so."

- 2) Haigis W, http://www.augenklinik.uni-wuerzburg.de/ulib/
- 7) Bullimore MA, Buehren T, Bissmann W, Agreement between a partial coherence interferometer and 2 manual keratometers, J Cataract Refract Surg. 2013 in press

# **Advanced measurement** of challenging eyes

#### **Dense cataracts**

In denser cataracts the ZEISS IOLMaster 500 achieves a measurement success ratio that is up to 20% higher than that of other optical biometry devices.<sup>4</sup> The underlying composite signal evaluation not only significantly increases the fraction of cataracts measurable with optical technology, but it also greatly increases signal-to-noise values.

#### **Post-LVC** eyes

The ZEISS IOLMaster 500 includes the Haigis-L formula which is dedicated to myopic and hyperopic post-LVC cases and is very convenient as it requires no clinical history data.<sup>8</sup>

#### Staphyloma, pseudophakic and silicone-filled eyes

Even with staphyloma, pseudophakic and silicone-filled eyes the ZEISS IOLMaster 500 measures along the visual axis, yielding the relevant axial distance.

			Haigis-L	Phakic IOI
Seam	~	Target refr	within .	OS left
user			D AL	m
	Myopic	Hyperopic	KD AC	R mm
Valid F	or myopic LASIK/LA RK or hype	SEK/PRK only1 Do not use ropic treatments!	after IOLEC	D) REF(D)
lintrac	ocular lens - exa	mple 1	•	
intrac	ocular lens - exc	mple 2	•	

*Reliable and accurate IOL power calculation for post-LVC patients with the Haigis-L formula.* 

The ZEISS IOLMaster 500 simplifies IOL power calculation for patients with prior laser vision correction.

"For me, there are only **few innovations** which have **revolutionized cataract surgery**. The IOLMaster is one of them."

> Prof. Dr. Wolfgang Haigis Würzburg, Germany

 Rivero L, IOLMaster Version 5 vs. Lenstar LS900, presented at 2010 AAO – MEACO Joint Meeting in Chicago, Illinois.

Haigis W, Intraocular lens calculation after refractive surgery for myopia: Haigis-L formula. J Cataract Refract Surg. 2008 Oct;34(10):1658-63.

### **Proven toric outcomes**

The results of a meta-analysis of 28 published clinical papers covering more than 1900 cases speak for themselves: you can trust the ZEISS IOLMaster 500 for toric IOL power calculation!

It was shown that the reported clinical outcomes for the ZEISS IOLMaster with regard to residual astigmatism "[...] exceed, or are at least as good as those using manual or automated keratometry."<sup>5</sup>

#### Mean reported reduction in astigmatism

"The reference image allows precise alignment of toric IOLs and simplifies workflow. That's definitely **the future of cataract surgery.**"

Prof. Dr. Oliver Findl, Vienna, Austria

## **Markerless toric IOL alignment**

#### **Option Reference Image**

The new Option Reference Image is the starting point of a markerless toric IOL workflow: An image of the eye is taken along with the keratometry measurement. Both reference image and keratometry data are transferred to the ZEISS CALLISTO eye<sup>®</sup> computer-assisted cataract surgery system. Finally, all data needed for precise and markerless toric IOL alignment is injected in color and high resolution where it is needed – in the eyepiece of the surgical microscope from ZEISS.

#### Automatic astigmatism detection

The new ZEISS IOLMaster 500 automatically acquires the reference image in case of astigmatism. The reference image is displayed on the report so your practice staff can recognize the astigmatism and you can take the treatment option of a toric IOL into account.

The new Option Reference Image for a markerless toric IOL workflow.

As landmarks for intra-operative matching, small blood vessels are used.

## Ease of use

#### Well-designed user interface

The highly intuitive ZEISS IOLMaster 500 design sets standards in easy-to-delegate biometry. Common sources of error are eliminated through an easy-to-understand traffic light indicator.

#### **Plausibility checks**

With the integrated automatic mode right-eye and left-eye values for axial length and corneal radii are compared and checked for plausibility – providing confidence especially for challenging eyes.

#### Automated workflow

The Dual Mode facilitates measurements of axial length and keratometry without the need for manual interaction – minimizing acquisition and chairtime.

#### **Distance independence**

The unique distance-independent telecentric keratometry is one of the reasons for the phenomenal ease of use of the new ZEISS IOLMaster 500. Focusing becomes much easier.

#### Chairtime

The average time needed to take a reading on the ZEISS IOLMaster 500 is up to 4 times faster compared to other optical devices.<sup>6</sup> A difference you, your team and your patients will notice every day.

"If you asked my staff which optical biometer they would go for, the answer would clearly be: the IOLMaster."

Prof. Dr. Sabong Srivannaboon Bangkok, Thailand

## **Superb connectivity**

#### Connect to ultrasound

Connect your compatible ultrasound devices directly via Option Sonolink. This new ultrasound interface is LANbased, workflow improved and open for various qualified ultrasound manufacturers.

#### Connect to OR

The new ZEISS IOLMaster 500 is part of the **ZEISS Cataract Suite** markerless, providing all relevant diagnostic data when it is needed and where it is needed.

#### Connect to IT

For integration into electronic medical records (EMR) and practice management systems, the new ZEISS IOLMaster 500 provides an interface based on wellknown DICOM standards.
