

L. M. PATEL ROTARY EYE HOSPITAL

Managed by : Bombay North West Rotary Public Charitable Trust

A millennium project of

Rotary Club of Bombay North West - Malad

How it started

Dreams may be dreamt with closed eyes but are realised by visible commitment and single minded effort.

Rotary Club of Bombay North West – Malad has converted a big dream in to a bigger reality.

A monumental edifice - Rotary Eye Hospital – named after Shri Lallubhai M. Patel whose trust – ASPEE Charitable Trust – donated handsomely, stands today as a beacon of light for those who are visually compromised.

A five storied building, fully equipped to deal with all eye problems, is standing tall today to offer excellent eye care at a very highly subsidised rate. Really deserving, financially weak patients are even treated free of cost.

This Rotary Service Centre has been handsomely supported by Rotarians of the club through handsome donations and illustrated the total commitment of all members.

The early stages of development of this institute attracted The Rotary Foundations' Matching Grant programme that enabled the club to receive around US\$ 69,000/-which was utilised to equip the hospital with major instruments and equipments.

One of the major activity of the institute is to conduct eye camps in financially weak housing complexes – almost one camp per week – the beneficiaries are treated free of cost – thanks to the generosity of Rotarians and sympathisers.

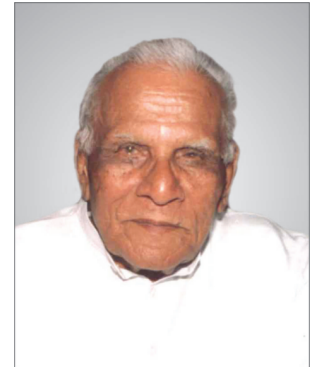

The institute has added another activity to its growing list of amenities.

A nursing school has been established to impart nursing education to the girls and some of these girls are absorbed by the hospital for its own need.

A diploma course in optometry, recognised Y. B. Chavan University help train optometrists who can then be employed usefully.

Periodic assessment and regular update of the needs are the corner stones of continued services.

The Eye Hospital, established in 2002, has completed nearly 13 years of service to the deserving community and its journey towards its goal of total eye care for the needy.

Our Strength : Quality treatment at affordable rates to the society through excellent infrastructure and instrumentation with good care.

L M Patel Rotary Eye Hospital opened in March 2003 with the intention & vision to cater to Lower & Lower Middle class of society. It started with all high end instrumentation so that even poor people get quality service at reasonable cost. We started with a focus on ophthalmic Super Speciality service so that patients get comprehensive eye care under one roof. We have observed that, society is very sensitive for eye and always want quality treatment for eyes at reasonable cost. So initially we observed that number of free or low paying patients were many, but now 60% or more patients opt for Low cost Phaco.

Looking at the requirements in 2008 we introduced a new category of Foldable lens.

We also started with detailed Counseling Centre in 2009 so that patients understand their eye problem & what type of surgery they should choose. So far we have been doing 20% of our work Totally Free, 40% at very minimum cost and remaining 40% of our patients pay us for high end category operations.

On an average : We check 150 patients a day in OPD out of which around 80 are new patients. We operate 13 patients every day, which include Laser surgery . Diabetic Retinopathy patient's average is 2 patients per day.

- Dr. Payal Doshi
MBBS, DOMS, Ex. Cornea-Fellow SGN, Jalna

Those committed to serve

Clinical Co ordinator : Dr. Nitin Malkan.

Full time Doctors

Dr. Payal Doshi, chief in charge ,
Dr. Dhara Pabari , Dr. Hemal Kenia

Cataract Surgeons

Dr. Manoj Agarwal , Dr. Mihir Shah, Dr. Parul Deshpande

Speciality Surgeons

Dr. Rashidaah Kutiyawala (Glaucoma) , Dr. Parul Deshpande (Cornea), Dr. Pritam Dedhia (Retina),
Dr. Siddharth Kesarmani (Squint & Paediatrics) , Dr. Kamlesh Gupta (Oculoplasty)

Anaesthetists

Dr. Arki Shah , Dr. Reena Bhagat, Dr. Vima Shah

Physicians

Dr. Anupam Desai , Dr. Paresh Parekh

Pathology Dept :

Sunflower Labs.

Co-ordinators

Lata Samant , Bina Sheth

List of Instruments

1. Auto Kerato - Refractometer - KR - 8100
2. Trial case
3. Trial Frame
4. Motorised Drum
5. Streak Retinoscope
6. Lensometer-Topcon-LM-AT
7. Keratometer super - KMS-6
8. A - Scan - Quantal Medical Axis II
9. Schiottz Tonometer
10. Slit Lamp - Topcon SL - 3C
11. Direct Ophthalmoscope
12. Applanation Tonometer
13. Indirect Ophthalmoscope
14. Chair Unit with Drum
15. Fundus Camera - RE - Xv3
16. Lasere Photocoagulation carl zeiss meditech AG
17. Visual Field Analiser - Perimetry
18. Visulas Yag Laser
19. Lenses
20D , 78D, 90D
3 Mirror Gonioscope
Lenses for yag capsulotomy & yag Iridectomy
20. Microscope - S7
21. Phaco Opticon
22. Micro Surgical Vitrectomy - 2000-V
23. Suction Machine
24. Fumigation Machine
25. Ot Table with Stool
26. Motorised Table
27. Small Autoclave
28. Big Autoclave
29. Sterilser
30. Cryo Aa3 Super Deluxe
31. Motorised Table
32. Volk Quadraspheric Laser Lens
33. E.C.G. Machine

We had 3 matching grants from The Rotary Foundation. Initially most of the instruments were purchased from this grant. International partner Rotary Clubs are

ROTARY CLUB OF WILLMETT, USA ● ROTARY CLUB OF PLYMOUTH, USA

We are extremely grateful for the guidance, suggestion & help to :

Dr. G. NATCHIAR

Vice Chairman Emeritus, Aravind Eye Care System

Mr. G. SRINIVASAN

President, Govel Trust (which runs Aravind Eye Hospitals & LAICO) and Director- Finance, Aravind Eye Care System

DR. P. NAMPERUMALSAMY, MS, DO, FAMS

Chairman- Emeritus, Aravind Eye Care System

Ms. Deepa

The Inauguration of the L.M.Patel Rotary Eye Hospital was held on held of 6th March, 2003 at the hands of Pujya Shri Rameshbhai Oza.

Shri Niranjn Pandya who gave inspiration for this project

Past R. I. President RI Frank Devlyn and his wife

We had the pleasure of receiving two volunteers from USA, Dr. Alvan and his wife Dr. Linda Balent both leading Ophthalmologists from Florida.

PDG Robert G. Ketron (Dist 7620) coordinator for "Avoidable Blindness"

First patient that was operated at our hospital, Seen here is Charter President and major donor Rtn. Sharad Patel presenting flowers to the patient, behind him is the team of doctors including president Dr. Nitin Malkan.

LM PATEL ROTARY EYE HOSPITAL ANNIVERSARY CELEBRATION

This week we complete one more satisfying and an excellent year. It has been a journey which has been extremely rewarding and 'eye opening'. We have completed 13 years and hope to complete many more in the future. The LM Patel Rotary Eye Hospital is another charitable and social service arm of the Rotary Club, Malad and perhaps the 'Jewel in the Crown'.

I have been associated with it as a honorary consultant ophthalmic surgeon right from its beginning. We started the journey with very small but confident steps to have now reached a stage where we are taking bigger and bolder steps.

I remember applying for attachment to the hospital many years ago for the post of honorary consultant with not much expectation of being selected. I had all the necessary qualifications, experience, skills etc but I was still skeptical. It was because at that time at most places to which I had applied I was asked 'What business will you bring to our hospital.' I unfortunately could not bring any and hence would be rejected.

We were a group of 20-25 ophthalmologists called for the interview for selection as honorary consultants in various categories. Some faces were known but most were unknown. We were all sitting with anxious faces waiting for our turn. The interviewing panel consisted of Dr. Nitin Malkan, Dr Mehta, Mr Kiran Patel and others and they did a very quick and thorough job of it. After the interview I was told immediately that I have been selected and was given the day of my choice. It was a very surprising and unimaginable experience. I headed the Monday unit. At that time we had 6 different units for the 6 days of the week, each unit consisting of 3 anterior segment surgeons and 1 retina surgeon. We also had other specialists on panel and some coming once a week. There were also 6 anesthetists appointed, 1 for each day. 1 full time ophthalmologist, Dr. Jalpa Shah was also appointed. All in all we were over 30 doctors working.

The initial days were a learning experience for us, our team, nurses, reception, optometrists etc. We had a good inflow of patient's right from the beginning probably because of the Rotary name, the efforts put in by the Club, the physical structure of the hospital, ophthalmic infrastructure and the service and quality of results given. We were doing free, charitable and paid surgeries without any bias. At that time we were having our OPD on the 2nd floor and OT on the 3rd floor. We have now expanded to the 1st floor also with laboratory facility. We had all the latest ophthalmic instruments of reputed brands like Phacoemulsification machine, advanced microscope, retinal laser, retinal fundus camera, automated perimetry etc. All these machines under one roof were uncommon in those days. We soon made a very good name for ourselves and patients started coming from near and afar. Some came as primary patients, some as referred, some for better treatment and some for retreatment's, we helped all.

Over the years we have modified our doctor system and now we have only 2 consultants for Phacoemulsification surgery (Dr Mihir Shah and myself), 1 expert each for glaucoma, retina, paediatric ophthalmology, oculoplastics and cornea with 3 anesthetists'. The whole set up is ably coordinated by a team of 3 full time ophthalmologists lead by Dr. Payal.

Dr Nitin Malkan has been behind the scene all through. The trustees and the Rotary Club team of Mr. Sharad Patel, Mr Kiran Patel & Mr Arvind Patel and others have been very supportive and helpful.

Today, we can conduct practically all types of surgeries in all specialties and subspecialties of ophthalmology.

When we embark on such a journey, over time we make a few errors, stumble along the way but all such experiences teach and enrich us to make us do better and better. We may have had a few shortcomings but they are only a means to tell us that we have many more steps to climb on our onward journey.

I hope that we all will be able to do even more and better.

carvan chalta gaya, log aate gaye, judte gaye, kuch bichadte gaye, carvan chalta gaya.

Dr. Manojkumar Agarwal
M.S., DNB, FCPS, DOMS, MFCO, FRF, DIT DHM.

It was in the December of 2001 that I got to know from colleagues that Rotary eye hospital was going to start and there were going to be interviews for Ophthalmologists. I applied and with man of my colleagues was selected for the said post of Ophthalmologist.

At the helm of the affairs at the hospital were Shri Sharadbhai Patel , Shri Kiranbhai Patel , Dr. Nitinbhai Malkan , Shri Arvindbhai , Shri Gautambhai , Dr. Anupambhai Desai and many other active Rotarians. Dr. Nitinbhai and all the trustees had decided to buy ophthalmic equipment which was top of the line, the entire aim being to give quality eyecare. With the able experience Of Dr. Malkan the latest equipment was procured for the hospital.

Since I have been associated with the hospital since its inception, I have seen it grow . The vision of the trustees was to try and give the best eyecare to patients of any strata that came to our hospital. The paying capacity of the patient was never the motive. The idea was to give comprehensive and quality eyecare with all the latest technology that was on offer to the patients coming to our hospital. In pursuit of trying to reach out to the economically vulnerable class of patients numerous camps have been conducted for detection of ophthalmic illnesses and their treatment.these patients have treated including undergoing surgery at no cost to the patient. In spite of the surgery being free for the patients all the protocols are followed so as to achieve the ideal result irrespective of what the patient is paying the hospital. All the trustees and Shri Sharadbhai in particular have been passionate in bringing the hospital to its current state.

Apart from providing services irrespective of the paying capacity of the patient,there has been a continuous endeavour to upgrade the equipment so as to be abreast with the latest in technology. The staff is courteous to the patient making it a pleasant experience for the patient.

For me personally it has been an educating and an enriching experience in treating patients with varied kinds of eye related complaints and trying to give optimum results. It is indeed a privilege to be working at this comprehensive eyecare hospital ' L M Patel Rotary eye Hospital '

- Dr. Mihir Shah
M.S. (Ophthal), D.N.B., FCPS, DOMS, ICO

Scope of expansion

The following are the areas in which the hospital can look into for expansion of its services:

1. Low Vision Aids Clinic: Some unfortunate patients have poor vision due to untreatable causes. Low vision aids and visual rehabilitation can help these patients cope with their disability and reduce their dependence on others.
2. Advanced Retina Diagnostics: The OCT is a non invasive imaging tool for the retina and has revolutionized the diagnosis, classification, treatment of several diseases which were previously untreatable. This will be much needed addition to the retina unit.
3. Advanced Glucoma Diagnostics: The OCT can be shared with the Glaucoma department for diagnosing enigmas like low tension glaucoma and pre perimetric glaucoma.
4. Eye Bank: Upgradation of Eye bank facilities to increase awareness, collection and utilization of corneas
5. Training: The hospital should become a training centre for paramedical allied staff for utilization in OPD and OR. It should aim to become a resource centre for supplying man power to other hospitals.
6. Outreach: The hospital should dedicate more human resources to cater to under-served areas away from the city.

Dr. Siddharth Kesarwani,
MS (Gold Medal) DNB FLVPEI FAICO(Ped Ophth)

L M Patel Rotary Eye Hospital is regularly organising diagnostic eye camps once in every week and operating on patients of cataract for FREE and other surgeries under heavy concession.

Continued support throughout the years has resulted in better and cheaper eye care. Mention must be made of Shri Nirmal Bang who bears the financial need of around 20 patients each month. This precious support has resulted in many more financially weak patients to undergo the required treatment free of cost.

The Four-Way Test

Of the Things that we say
or Do?

1. Is it the TRUTH?
2. Is it FAIR to all concerned?
3. Will it build GOODWILL and BETTER FRIENDSHIPS?
4. Will it be BENEFICIAL to all concerned.

TYPES OF SURGERY

- Cataract Surgeries of various types, with stitches and Imported Lens
- Laser (Phaco) With Imported Lens,
- Laser (Phaco) With Indian Foldable Lens,
- Foldable Lenses implant with American / European lenses,
- Foldable Lenses implant with German Zeiss lenses
- Glaucoma Surgery
- Squint Correction Surgery
- Ptosis Surgery
- Pterygium
- Autograft with Pterygium
- Dacryocystorhnostomy with Tube
- Plastic Surgery
- Chalazion Surgery
- Cryo Treatment
- Retinal Detachment Corrective Surgery
- Vitrectomy
- Surgery For Eyelid Cancer
