Cash donations or checks payable to Imperial Rotary Club

Proceeds from today's breakfast will help pay for Tripod Rescue Equipment for our Volunteer Fire Department's Rope Rescue Squad.

Arizona Vortex Tripod Kit

Tripod rescue gear helps firemen in rope rescue situations in virtually any urban, industrial, or wilderness location. In our rural setting, the Tripod would provide stability for our volunteer firemen when they must use ropes and pulleys from the tops of buildings, grain bins, or rocky structures to help rescue victims. It is also useful for confined space rescue.

It increases the safety not only for victims but for the firemen themselves and speeds up the rescue process when time is a critical factor in the victim's survival. At present, Imperial's Rope Rescue Squad does not have any access to this equipment.

Cost: Approximately \$5,000
